Foreword*Giuliana Gemelli*

This book is the product of the Research Laboratory of MISP. The idea of this research project was firstly developed in an international seminar held in Bologna, October 14-15 2004.

Other articles were commissioned to the authors during the following months as a result of the debate during the seminar. Most of the collaborators are part of the Faculty of the Misp during its second and third edition. The students also collaborated with their working papers to develop the research framework.

The editor wish to thank Deborah Bolognesi, Antonella Cardellicchio and Paolo Palenzona who are part of the MISP staff and research laboratory for their thoughtful, dedicated and passionate collaboration in the research activities as well as in the final edition of the book. The editor would like to thank the Istituto Banco di Napoli – Fondazione, the Fondazione Adriano Olivetti, the Fondazione Cassa di Risparmio in Bologna and the Fondazione Cassa dei Risparmi di Forlì that generously supported our initiative.

The book is divided in two parts. The first one develops a study of the vision values and role of philanthropy in the framework of religious traditions, in a global perspective as well as from the historical point of view. The
